KERN-LIEBERS

KNITTING PARTS

Sinkers and needles for single and double cylinder sock machines

KERN-LIEBERS quality

- Highest demands in terms of product quality, evenness, rounding and hardening
- Renowned and proven KERN-LIEBERS quality
- OEM co-operation for toughest requirements
- Highly flexible
- Perfect surface integrity
- Partial hardening for heavily strained areas of parts

The KERN-LIEBERS product range

Single cylinder sock machines:

Needles · Sinkers · Transfer jacks · Selectors · Cylinder bars · Miscellaneous machine parts

Comprehensive complete product range for virtually all machines worldwide.

Due to close co-operation with leading machine manufacturers, KERN-LIEBERS products meet all OEM specifications.

Good surface integrity and rounding make KERN-LIEBERS sinkers the ideal solution, even for the finest yarns. The variety of our product range means that the right part is always available.

KERN-LIEBERS stamping technology ensures trouble-free manufacture of technically demanding transfer jack forms.

Double cylinder sock machines:

Needles · Sliders · Sinkers · Selectors · Bluff bits · Miscellaneous machine parts

Selectors are available in a range of variants. Heavily strained areas such as selector feet are also available with partially hardened feet.

With their perfect running characteristics, the sliders available for double cylinder sock machines are ideal for even the highest machine speeds.

Our extensive range of parts is rounded off with a large needle range .
